

PUBLIC TRANSPARENCY REPORT

2024

Veritas Pension Insurance Company Ltd

Generated 25-11-2024

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2024 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented. The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Responsible investment is an integral part of our ambition to grow and protect our beneficiaries' assets. Incorporating environmental, social, and governance ("ESG") factors into our investment processes is key to meeting our fiduciary duty to invest pension funds in a profitable, secure, and responsible manner to meet the required pension commitments in the future. Responsible investment is our way of securing investment returns in the long term and a way of ensuring that risks and opportunities are considered as widely as possible in investment decisions.

We integrate ESG into our investment processes with the aim of making better-informed investment decisions and with the ambition of delivering competitive, long-term investment performance. When it comes to protecting and progressing societies, we have the responsibility, as an asset owner, to promote sustainable development.

ESG Integration is about addressing environmental, social and governance related factors alongside financial factors in the investment process. For direct investments, we use ESG data to identify material ESG risks and opportunities, whereas for fund investments, we leverage our proprietary ESG Assessment Framework in assessing to what extent fund managers have policies, resources, and activities in place in connection to responsible investment.

Responsible investment is about taking responsibility, which is why being an active owner is key. As an investor, we seek to address material ESG matters rather than divesting when issues of concern arise, leaving the problem to someone else to solve. Real world impact cannot be achieved by divesting or refraining from investing. We engage with companies and asset managers through dialogue, we vote at annual general meetings, and we participate in joint investor initiatives to e.g. encourage companies to take action on climate change. We pay close attention to investees' adherence of international norms and standards such as those issued by OECD, International Labour Organization (ILO), and United Nations (UN).

Climate change is one of the most significant global threats of our time. The impacts of climate change extend to investments presenting both risks and opportunities. As a long-term investor, we are strongly committed to a sustainable future, which is reflected in our commitment to strive developing our investment portfolio to be carbon neutral by 2035, and for our real-estate portfolio, already as soon as by 2030.

We always ensure that our investments and our own activities are sound and in accordance with principles of good governance. We require good governance from investee companies and fund managers, and in our own operations, we follow the investment processes of an institutional investor.

In everything we do, we seek to be transparent and clear in our responsible investment reporting and disclosure.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

During 2023, we clarified our approach to responsible investment and worked systematically to realize our goals. We conducted our annual ESG survey among our asset managers, allowing us to clarify, for instance, climate-related risks and opportunities as well as the asset managers' commitment to the climate goals.

Of the asset managers who responded to the 2023 survey, all reported having a responsible investment policy in place that outlines the principles of responsible investment and their application in investment activities. This is an important step forward, since it is essential to us that ESG issues are taken into account in investment activities in a way that is appropriate to the asset manager's investment strategy.

We introduced a renewed assessment framework for external asset managers, which facilitates the systematic assessment of the asset managers' processes, resources and activities from responsible investment perspective as part of the investment decisions and continuous monitoring of asset managers. The assessment framework also serves as a tool and foundation for engagement with asset managers regarding the development of responsible investment activities.

Active ownership and engagement are a key component of responsible investment. Our primary goal, indeed, is to support positive change within companies and only as a last resort to exit the investment, in case engagement does not bring about the desired result. During the year, we engaged in an active dialogue with companies on sustainability issues and discussed, for instance, how sustainability has been integrated into their corporate strategy and business operations.

In the past few years, we have noted that biodiversity has been increasingly included in the investors' agenda alongside climate change. Through co-operation and active dialogue, we want companies to become aware and take action to stop biodiversity loss, which is why we joined the Nature Action 100 initiative for investors. The aim of the initiative is to encourage companies to increase their ambition and action as a way of halting biodiversity loss.

Taking biodiversity issues into account in investment decisions remains quite challenging. During the year, we modelled the dependence and impact of our investment portfolio on natural capital and identified critical industries with regard to biodiversity loss. However, we still need commensurate indicators so that we can truly take biodiversity loss into account as part of our investment decisions. As indicators develop, we also see that they will offer attractive investment opportunities in terms of halting biodiversity loss.

Climate change mitigation is one of our most significant focus areas in responsible investment, and part of our corporate responsibility program. The current climate roadmap encompasses listed equity investments, real estate investments, and corporate bonds. As the data coverage improves, we aim to expand the climate roadmap to encompass more asset classes in the future. Our climate action has progressed according to our climate roadmap, and we are even ahead of our climate targets. In listed equity and corporate bond investments, we have managed to reduce the carbon emissions by 46 per cent in comparison to the level of 2020. The carbon emissions of our real-estate portfolio have reduced as much as 84 per cent during the same period.

We continued to influence through collaborative engagement initiatives. Through CDP's Non-Disclosure Campaign, we influenced companies to report on climate change, and with The Investor Agenda, we are influencing countries to set more ambitious climate goals. Similarly to past years, we were also involved in CDP's Science-Based Targets collaborative initiative.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

In the next two years, we are keen to continue our work in relation to responsible investing and keep a close eye on the developments of responsible investment in the markets. We will continue to systematically monitor and gradually reduce the carbon footprint of our investment portfolio. Our climate roadmap and goals for a carbon-neutral investment portfolio enable us to navigate successfully in a changing world. Moreover, our goal is to gradually expand our climate roadmap and climate reporting through collection of increasing volume of data from more asset classes as soon as the data becomes available.

We will be working with ESG data to gain a holistic view of our investment portfolio and better understand the associated risks and opportunities. This involves enhancing the integration of ESG factors into our analysis to capture all relevant dimensions. Identifying reliable and relevant ESG data points and sources is crucial. By leveraging high-quality data and developing in-house analysis capabilities, we aim to make informed decisions and align our portfolio with our sustainability goals. Engaging with up-to-date ESG data ensures our analysis remains robust and forward-looking.

We updated our ownership policy principles towards the end of 2023 and are now ready to truly put them into practice. We want to further clarify our expectations as an owner to ensure that the principles of good governance are implemented in the companies in which we have a holding, as we believe this will increase and safeguard the shareholder value in the long term. With the help of new tools and analytics, we will be able to more efficiently relay our expectations as part of Annual General Meeting voting and engagement with companies.

Does your formal responsible investment policy(ies) identify a link between your responsible investment activities and your fiduciary duties or equivalent obligations?

(A) Yes

Elaborate:

Veritas Pension Insurance implements the statutory earnings-related pension scheme in Finland. As a pension insurer, we bear our responsibility for pension assets: we invest pension funds in a way that is profitable, secure, and responsible. It is our fiduciary duty to identify risks and return opportunities holistically in our investment activities – taking material ESG factors into account is one part of this review. Responsible investment is our way of securing the return on investments in the long term and at the same time a way of ensuring that risks and opportunities are taken into account as widely as possible in investment decisions.

Has your organisation identified climate-related risks and opportunities affecting your investments?

- (A) **Yes, within our standard planning horizon**

Specify the risks and opportunities identified and your relevant standard planning horizon:

Changes in valuations as the regulation of climate change proliferates in securities investments. Decline in the valuations of carbon-intensive industries, increased costs, such as prices of emission rights and carbon tax in securities investments. A substantial increase in the costs of building or renovation. Liability or reputational risk for buildings not being up to par with modern requirements. Risk in coastal areas and river deltas. Deterioration in the availability of insurance cover and a decline in the valuation of real estate. The need for enhanced protection may increase costs. New technology for green transformation.

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

In responsible investment, one of our focal areas is climate change mitigation. We have set climate-related objectives for our investment activities: our goal is to reduce the carbon intensity of our portfolio and to increase the share of low-carbon investments. We endeavour to develop our portfolio to be carbon neutral by 2035. In our climate policy, we define the measures to be taken in order to manage the climate risks related to our portfolio and to mitigate climate change.
